

# Repository management working group status report

Repository creation request:

**Create new issue**  
Repository creation request · [Choose a different template](#)

**Add a title \***

Note that this issue is public so do not use this form to request the creation of a private or otherwise sensitive repository.

**Requested name \***  
What is the exact name that you want the new repository to have? Please make sure there is not namin collision.

**Responsible group/person \***  
Which CHERI Alliance working group or person will initially be responsible for the maintenance of this repository?

**Purpose of the repository**  
What is the purpose of the repository you are going to create  

Write

H B I

≡ <> ↻

To develop CHERI-support in some project.

📎 Add files

**Fork of another repository**  
If this is a fork of another repository, what is the URL of that repository?

**Lifetime of the repository \***  
What is the expected lifetime of this repository? Is it short term, for example for adding CHERI support with a clear plan to upstream? Or is it long term, for example a CHERI Alliance repository that will be supported long term?  

Short term ▾

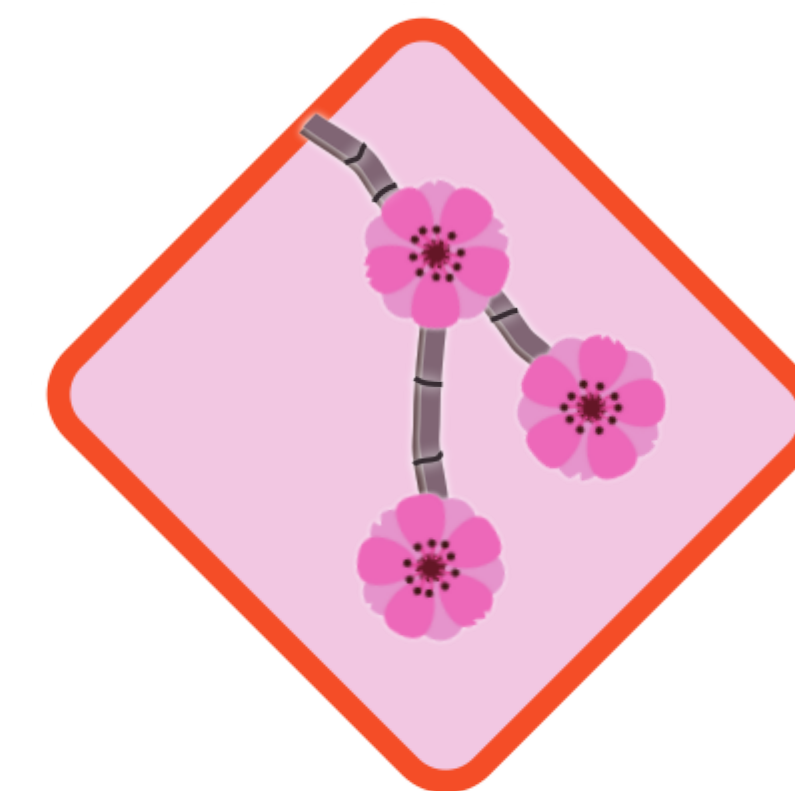

# Standardise CHERI Alliance repositories to support

# CHERI development in the open

Repository creation rules:

- 🌸 Declare responsible working group or person.
- 🌸 Define purpose and lifetime of projects.
- 🌸 Branch protection and code review recommended.
- 🌸 Permissive licenses for new projects.
